

ALAGU JOTHI ACADEMY

(An International Standard CBSE Sr.Sec.Schol)

CIRCULAR

Date : 30.08.17

Dear Parent,

Fidget spinner. ... The toy has been advertised as helping people who have trouble with focusing or fidgeting by relieving nervous energy or psychological stress. There are claims that a **fidget spinner** can be used to help calm people down who suffer from anxiety and other neurological disorders like ADHD and Autism.

According to the doctors' advice no normal person should use it.

This Fidget spinner is strictly banned in our school campus. If found with children it would be confiscated and would not be returned back.

**Regards
Principal**
